

From Orders To Reviews

End-to-End Business Analysis — Olist Brazilian E-Commerce Marketplace

Business Context & Objectives

Olist connects customers with independent sellers across Brazil.

Understanding operational performance, customer satisfaction, and revenue drivers is critical for sustainable growth.

Revenue Trends

Analyze revenue patterns over time

Customer Retention

Measure repeat purchase behavior

Delivery Performance

Track on-time vs. delayed orders

Regional Risk

Assess revenue concentration by state

Dataset Overview

The dataset spans **September 2016 to October 2018** and covers the complete customer journey from order placement to delivery and reviews.

Customers & Orders

Order items, payments, and geolocation

Products & Sellers

Category translations and seller data

Reviews

Customer satisfaction scores

Overall Business Performance

Customer Retention Crisis

	buyer_type text	customers bigint	percentage_share numeric
1	Repeat Buyer	2997	3.12
2	One-Time Buy...	93099	96.88

Customer acquisition is strong, but **retention is a major challenge**. Only 3.12% of customers return for a second purchase, leaving the vast majority as one-time buyers and limiting long-term revenue potential.

One-Time Buyers

Customers who never returned

Repeat Buyers

Customers who made multiple purchases

RISK #2

Delivery Performance & Satisfaction

	delivery_status text	avg_review_score numeric	total_reviews bigint
1	On Time	4.29	88653
2	Late	2.57	7708

Overall fulfillment is strong, but **delayed deliveries significantly damage customer satisfaction**. On-time orders average 4.29 stars; delayed orders drop to just 2.57 — a gap of 1.72 points.

91.89%

Orders delivered on time

8.11%

Orders delayed

Revenue Concentration Risk

	customer_state text	total_revenue double precision	revenue_share_percentage double precision
1	SP	5067633	38
2	RJ	1759651	13
3	MG	1552482	12
4	RS	728897	6
5	PR	666064	5

Revenue is heavily concentrated geographically and by product category, creating significant business risk and dependency on a limited set of regions and segments.

~63% from Top 3 States

Out of 27 states total

~38% from a Single State

Extreme geographic dependency

Limited Category Diversity

A few product categories drive a significant share of revenue

Seller Performance & Product Categories

	seller_id text	total_orders bigint	late_delivery_percentage numeric
1	2709af9587499e95e803a6498a5a56e9	25	92.00

10	ad781527c93d00d89a11eec9dcad7c1	38	31.58

Seller Delivery Issues

Several sellers exhibit very high late-delivery percentages, highlighting operational improvement opportunities. Monitoring and improving seller performance is critical for maintaining overall customer satisfaction.

Category Dependency

A limited number of product categories drive a significant share of revenue, indicating dependency on a few product segments. Diversifying revenue sources across categories reduces business risk.

Business Impact & Recommendations

- **Boost Retention**
Improve post-purchase engagement and loyalty initiatives
- **Fix Delivery Gaps**
Monitor and improve sellers with high delay rates
- **Expand Geographically**
Enter underpenetrated states to reduce regional dependency
- **Diversify & Predict**
Improve lower-rated categories and introduce predictive analytics for demand forecasting and retention

Future Opportunities & Conclusion

Demand Forecasting

Predictive models to anticipate demand

Churn Prediction

Identify at-risk customers early

Recommendation Systems

Personalized product suggestions

Seller Risk Monitoring

Track seller performance and flag risks

Customer Segmentation

Targeted strategies by customer profile

 **Conclusion:** Olist demonstrates strong growth and operational reach across Brazil. Improving **customer retention** and reducing **delivery-related dissatisfaction** should be the highest priorities for sustaining long-term growth.
